

LABOPORT® Filtration Pump N811KVP N811KV.45P

Series N811 diaphragm pumps are single-head, dry-running devices used in a wide range of laboratory applications. They transfer, evacuate and pump down without contamination. The heart of these very compact pumps is a KNF structured diaphragm. This patented diaphragm was stress-optimized using the finite elements method. As a result, we were able to make the pumps smaller while increasing the service life of the diaphragm.

The pumps are available in various versions differing in the materials which contact the media.

Material in contact with the pumped media

Type/OrderNo.	Pump head	Diaphragm	Valves
N 811 KVP	PPS	FKM	FKM

LABOPORT® Mini Diaphragm Vacuum Pump

Technical features:

- 100% oil-free transfer
- Pure transfer, vacuum service only
- Version for slightly aggressive or corrosive gases and vapors
- Maintenance-free
- Environmentally friendly
- High level of gas tightness.

Technical data:

N811KVP All Models

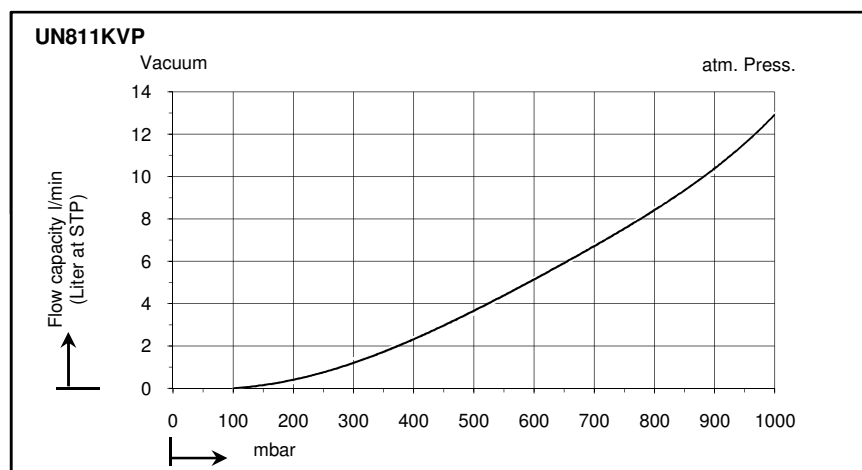

Delivery (l/min) ¹	13
Ultimate vacuum (Torr)	75
Operating pressure (psig)	15
Connectors for tube (in. ID)	1/4
Permissible gas and ambient temperature	+5...+40 °C
Mains	115V/60Hz
Motor protection	IP 20
Power P ₁	100 W
Operating current	0.9 A
Weight	2.5 kg
Dimensions LxHxW (mm)	187/157/90
With thermal switch and power fuse.	

Motors with other voltages and frequencies on request. Specify N811KV.45P for vacuum gauge package.
