To whom it may concern:

Re: European Union regulations to govern **REACH** (Registration, Evaluation, and Authorization of **CH**emicals)

KNF Neuberger is a manufacturer of diaphragm pumps and systems. According to REACH we are a company that is supplying products and not the raw materials, chemicals, or mixtures of chemicals such as glue, coatings, paints, etc. that are covered by the regulation and are not obligated to register. Therefore the products we supply are not subject to registration.

For the purpose of product security and in our own interest we will carefully monitor the process of the REACH implementation and the resulting requirements.

We will be contacting our suppliers of chemicals and mixtures to track and react on their implementation of REACH. Our own production procedures are using mainly standard materials which are produced for many different branches and in high quantities. Accordingly we have confirmation from most of our suppliers that the pre-registration and the successive final registrations are on schedule.

Please feel free to contact us at your earliest convenience with any further questions.

Best regards,

KNF Neuberger, Incorporated
